Professional Summary

Enthusiastic Computer Science fresher with a specialization in Data Science and a strong interest in web development. Familiar with machine learning concepts and AI-driven solutions, alongside hands-on experience with HTML, CSS, JavaScript, and React. Completed academic projects and certifications that demonstrate a passion for learning and building real-world applications. Looking for an opportunity to contribute, grow, and collaborate in a dynamic tech environment.

Education

B.Tech in Computer Science and Engineering	2023 – 2027
<i>Galgotias University, Gautam Buddha Nagar CGPA: 7.5/10</i>	
Class XII	May 2023
<i>Percentage: 78.00%</i>	
Class X	May 2021
<i>Percentage: 80.6%</i>	

Internship

AI-ML Virtual Internship	July 2025 – September 2025
<i>Google for Developers India Edu Program (via AICTE & EduSkills)</i>	<i>Remote</i>
– Completed an AI-ML virtual internship under Google for Developers, focusing on ML model development and AI-driven solutions.	
– Gained hands-on experience with ML workflows — data preprocessing, model training, evaluation, and optimization.	
– Worked on real-world AI problem statements, strengthening practical skills in Python and core ML frameworks.	

Technical Skills

Languages: Java, Python, SQL (Basic)
Core CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, SDLC, Software Testing
Development: HTML5, CSS3, JavaScript (ES6), Responsive Web Design
Data Analytics: SQL Queries, Data Cleaning, Feature Engineering, Visualization, Matplotlib
Tools/Platforms: Git, Jupyter, VS Code, IntelliJ, Eclipse
Soft Skills: Teamwork, Active Listening

Projects

StyleAI – AI Personal Styling Assistant <i>Flask, Python, Groq API, LLaMA 3.3 70B</i>
– Built a Flask web application that analyzes user-uploaded photos to detect skin tone (Fair, Medium, Olive, Deep) and generates personalized, gender-specific fashion recommendations using Groq’s LLaMA 3.3 70B model.
– Engineered an AI pipeline delivering outfit ideas, curated color palettes, and vendor-agnostic Google Shopping links — enabling seamless cross-retailer product discovery without third-party dependencies.
– Designed a responsive, professional UI with real-time AI inference, supporting Men, Women, and Non-Binary styling profiles for inclusive and accurate fashion consultation.
Skin Cancer Detection – CNN Classifier <i>Python, TensorFlow, Keras, CNN, Google Colab</i>
– Designed and trained a Convolutional Neural Network (CNN) to classify skin lesion images across 7 categories including Melanoma, Basal Cell Carcinoma, and Nevus, achieving a test accuracy of 74.28% on 1,003 samples.
– Evaluated model performance using precision, recall, and F1-score metrics — attaining strong results on dominant classes such as Nevus (F1: 0.87) and Vascular lesions (F1: 0.83).
– Analyzed class imbalance challenges across 7 skin condition categories and applied data preprocessing techniques to improve generalization of the CNN model on real-world dermatological datasets.
PhishGuard – Chrome Phishing Detection Extension <i>JavaScript, Chrome Manifest V3</i>
– Developed a privacy-first Chrome Manifest V3 extension that performs real-time phishing URL detection entirely on-device using an intelligent rule-based scoring engine — zero external API calls or data transmission.
– Implemented multi-level risk classification (Safe / Suspicious / Dangerous) with color-coded visual indicators and dynamic in-page warning banners to alert users before credential submission on high-risk sites.
– Architected the extension with clean, modular JavaScript functions providing detailed per-flag risk breakdowns, making the codebase ideal for both production deployment and educational reference.

Certifications

- Python, Java, SQL — GUVI Platform
- Design Thinking — NPTEL
- Database Management Systems (DBMS) — Oracle

Honors & Awards

- Top 10 Finalist — Smart India Hackathon (SIH) 2024 & 2025.
- Secured Top 5 Position — University Hackathon 2024.
